

STOP NETWORK OUTAGES ON YOUR FLOOR

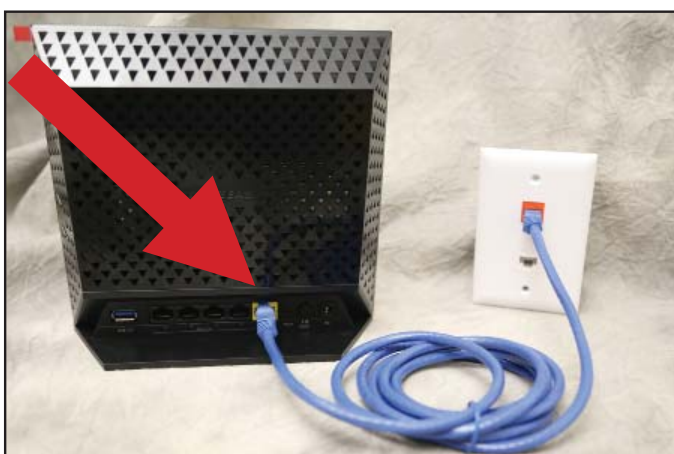

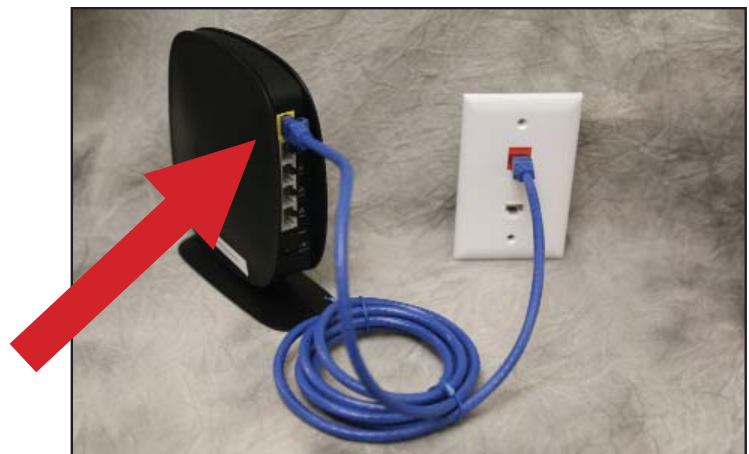

For more info visit
housing.uark.edu/ResNet

Do not plug the LAN ports on your router into your wall jack.

Make sure you are connecting your router correctly.

Connect the WAN Internet Port* on your personal router to the wall jack. This port is often a different color than the others.

* The WAN port may be labeled WAN, Ethernet, Internet, or modem.

For router connectivity questions please contact ResNet Support at (479) 575-3951
