Getting Online With Guest Access

Dear University of Arkansas Guest,

Please use this guide as a do it yourself method for getting online. Your network ports can be found in your rooms for network access. Instructions for getting online can be found below.

What do I need?

- CAT5e or CAT6 network cable – can be purchased at your local Wal-Mart, Campus Computer Store or other local convenience stores (telephone cable will not work).
- Valid Email address
- Working web browser (Examples: Firefox, Internet Explorer)

Connection Instructions:

- Plug your network cable into the computer and network port located on the wall of your room.
- Turn on your computer and open your web browser and select guest access.
- If you are not directed to a registration page go to the following web address:
  - http://ns8200-1.uark.edu/registration/GuestLogin2.html

- Enter a valid email address and click “submit”. Wait while your network address is reconfigured (may take up to 5 min).
- You may need to close and open your browser to get access.
- You should now have network access for the next 24 hours. You will have to register again after your time limit is exceeded. If you were unable to get access please try the process again. If you have tried more than 3 times to get online please call University Housing (479) 575-3951 during business hours.
- Advanced troubleshooting is located at https://housing.uark.edu/resnet under current headlines. In most cases this page is accessible prior to completion of successful registration.

If you were unable to get access please try the process again. If you have tried more than 3 times to get online please call University Housing (479) 575-3951 during business hours.
